

# ALPANA POTHUKUCHI

Alpana.pothukuchi@gmail.com | (617) 712 - 5581 | Atlanta, GA

## SUMMARY

*Analytics and AI Professional with 10+ years of experience modernizing enterprise data systems, leading cloud migrations, and delivering scalable, production-grade analytics across complex environments. Proven track record migrating on-premise analytics platforms to AWS, enabling secure, high-availability, and self-service reporting at scale. Certified Scrum Master with strong foundations in software engineering and Agile delivery, bridging analytics, engineering, and business teams to own end-to-end data products. Deep expertise in SQL, Python, Power BI, cloud-native analytics, and AI-assisted decision systems, with a strong focus on responsible, explainable AI and durable data architectures that drive measurable business impact.*

**Certifications:** *Certified Scrum Master (CSM) | Power BI Data Analyst Associate (PL-300)*

## PROFESSIONAL EXPERIENCE

### **Senior Business Data Analyst | Delta Air Lines, Atlanta, GA**

**Jun. 2024 – Present**

- Designed, built, and automated Power BI and Adobe Analytics dashboards powered by Dynatrace telemetry, improving observability, trend analysis, and performance monitoring used across the organization.
- Automated recurring Power BI reporting and operational tasks using Copilot AI and Power Automate, eliminating manual effort and saving several hours per week per manager, accelerating access to insights and reducing reporting latency.
- Prepared executive-level analytics decks reporting performance, reliability, and business insights; materials were reviewed by the CEO and senior leadership and adopted organization-wide to guide performance evaluation and business decisions.
- Served as Scrum Master for analytics and reliability initiatives, creating and streamlining user stories, coordinating cross-functional teams (SRE, platform, product, Akamai), and supporting Akamai configuration changes with clear delivery alignment and risk visibility.
- Monitored site reliability and performance using Dynatrace, validating tests and endpoints, tracking MTTR for incidents, and consolidating reliability metrics to enable faster triage and data-driven incident response decisions.

### **Senior Data Analyst | HMHS, Pittsburgh, PA**

**Jan. 2023 - Mar. 2024**

- Leveraged Power Query and Excel to develop robust data validation processes, significantly reducing validation turnaround time by 70%. This ensured data accuracy and integrity during the migration process.
- Developed stored procedures to update print rule files, enabling configurable print functionality within Dynamics 365. This customization allowed flexible and efficient printing processes tailored to specific business requirements.
- Configured Python scripts to automate print processes within Power Platform for various regional deployments. This automation streamlined printing operations, improving efficiency and reducing manual effort by 80%.
- Led a team of analysts on a Pennsylvania region analytics project, coordinating efforts to deliver actionable insights. This involved guiding the team through migration, meeting project milestones, and fostering collaboration and knowledge sharing.

### **Senior Data Analyst | Walmart Inc, Reston, VA**

**Jan. 2022 - Dec. 2022**

- Partnered with Store Management teams to gather requirements and design Tableau dashboards providing executive-level visibility into store operations and inventory performance, with drill-downs from enterprise views to individual store-level insights.
- Built connected Tableau dashboards driven by user stories, enabling seamless navigation across KPIs, trends, and operational reports to support regional and store-level decision-making.
- Collaborated with Vendor Management teams to research and validate vendor invoices, validating JSON data with database entries using R, identifying discrepancies and improving accuracy through data-driven controls.
- Designed relational tables and authored SQL stored procedures to automate invoice validation and reconciliation workflows, reducing manual effort and improving processing efficiency.
- Led data modeling and mapping efforts to ensure consistency, accuracy, and scalability across store, inventory, and vendor datasets.
- Collaborated closely with development and QA teams in an agile environment, ensuring timely delivery of features and bug fixes while maintaining clear communication across onsite-offshore teams.

### **BI Developer | TIAA, Charlotte, NC**

**Dec. 2019 – Dec. 2021**

- Led dashboard and data migration from IBM Cognos to AWS QuickSight, validating datasets in SQL and ensuring reporting continuity while modernizing the BI platform.
- Built and delivered 50+ AWS QuickSight dashboards for claims analytics, enabling scalable, self-service reporting and improved visibility into operational and financial performance.
- Performed data validation and reconciliation using SQL and advanced Excel functions, documenting data conflicts, gaps, and transformation issues, and partnering with data engineering teams to drive resolution.
- Developed data retrieval and processing scripts in Azure Synapse, sourcing data from Alteryx workflows, transforming it, and inserting curated datasets into downstream databases.

- Collaborated cross-functionally with analytics, engineering, and business teams to ensure data accuracy, scalability, and alignment with enterprise reporting standards.

**Sr Associate SW Applications Engineer | Extreme Networks, Salem, NH**

**Aug. 2018 – Nov. 2019**

- Identified changes in data type, fields, and tables for XMC 6.3 version from XMC 5 version and documented the changes.
- Developed edge cases and provide detailed insight into the capabilities and access permissions across the domain to aid in UI consistency and to ensure a single point of failure, saving time and money on the potential future redesign.
- Redesigned the front end webpage for the Xtreme Networks applications using AngularJS, JDE, JSONs, and XML.
- Drove end-to-end migration of on-prem systems to AWS, redesigning data architecture using S3, RDS, and cloud IAM controls to enable scalable analytics, high availability, and secure access.
- Facilitated requirement gathering from internal teams and third-party business teams to enhance custom web applications for order management, ensuring alignment with business objectives.
- Authored user stories with acceptance criteria, functional design documents, table designs, and data mapping to support seamless integration of web-based order management applications with backend ERP systems like JDE 9.2.
- Developed test plans and executed test cases (functional, integration, end-to-end, and regression) while logging defects to enhance system reliability and performance.

**Software Engineer Intern | Vestmark Inc., Boston, MA**

**May 2017 – Aug. 2017**

- Designed stored procedures to identify the database deadlocks for financial transactions and helped to speed up the bug fix process by 80% in the reconciliation domain.
- Developed reports using SQL and automated the notifications of these reports using Tableau for client specific requirements.
- Gained CI/CD pipeline knowledge by using Atlassian software management suite (Bamboo, JIRA, Confluence) with Bitbucket and collaborated within an agile scrum team.

**Database Programmer | Yardi Software India Pvt. Ltd., Pune, India**

**Nov. 2013 – Jul. 2016**

- Designed tables (Relations), functions, stored procedures, views, and triggers and optimized the database performance as SQL developer for residential, core (financial), and utility billing teams.
- Developed and edited SQL scripts, Crystal, and SSRS reports for client-specific requirements and fixed around 700 issues, thus increasing the turnaround time to address customer service cases by 50%.
- Received client appreciation for outstanding work in improving the performance of financial reports by decimating the turnaround time from 5 minutes to less than a minute.
- Created a knowledge repository, trained my peers, and mentored interns on all issues related to SQL scripts in the financial domain.

---

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL (T-SQL, PostgreSQL), R, Java, DAX, M (Power Query)

**Databases:** RDBMS, Microsoft SQL Server, Oracle, MySQL, MongoDB, Postgres SQL, Neo4j

**Data Visualization:** Power BI, Tableau, Google Data Studio, Looker Studio, AWS QuickSight

**Tools:** Git, JBoss application server, TravisCI, Bamboo, JIRA, Confluence

**IDE:** Eclipse, NetBeans, Visual Studio, Spring Tools Suite (STS), R Studio

**AI, ML and Decision Intelligence:** Prompt Engineering for analytics, AI-assisted workflows (Copilot), PyTorch, TensorFlow, Responsible & Explainable AI, Applied Machine Learning fundamentals.

**Cloud Platforms:** Amazon Web Services (QuickSight, S3, EC2, Lambda, RDS, IAM), Microsoft Azure, Google Cloud Platform

---

## EDUCATION

**New England College**  
**Master of Science in Data Analytics**

Henniker, NH  
**May 2023**

**Northeastern University**  
**Master of Science in Information Systems**

Boston, MA  
**May 2018**

**Osmania University**  
**Bachelor of Engineering in Computer Science**

Hyderabad, India  
**May 2013**

---

## VOLUNTEER EXPERIENCE

**Team Lead | CCT Atlanta**

**Mar. 2024 – Dec. 2024**

- Led a cross-functional volunteer team to deliver data insights and KPI frameworks for a community-focused swim safety organization, supporting program effectiveness, operational tracking, and data-informed decision-making.
- Defined success metrics, designed reporting templates, and established structured data collection processes to improve visibility into participation, curriculum outcomes, and safety impact.
- Supported the rebranding and digital strategy for a nonprofit organization serving cancer patients, using data-driven insights to strengthen messaging, audience engagement, and community outreach.
